Experience

Java Developer Trainee | JSpiders   May 2024 - Oct 2024

As a Java Developer Trainee at JSPider, I gained comprehensive experience in developing dynamic web applications using *Java, Servlets, JSP, JDBC, Spring Framework, and Spring Boot*. My training also strengthened my front-end skills with *HTML, CSS, Bootstrap, React JS, and Tailwind CSS* for responsive design. I worked with Hibernate and JPA for data persistence and managed databases using *MySQL*. Through project-based learning, I implemented *RESTful APIs* and integrated key functionalities across the tech stack, allowing me to apply theoretical knowledge in practical scenarios and advance my skills in modern software development.

Web Developer Intern | InternPE   Oct 2024 - Nov 2024

As a Web Development Intern at InternPE, I worked on building responsive web applications using HTML, CSS, JavaScript, and React. I collaborated with the development team to implement front-end components, optimize performance, and ensure cross-browser compatibility. I gained hands-on experience with version control using Git and contributed to debugging and testing processes to ensure high-quality code. This internship significantly improved my web development skills and prepared me for larger-scale projects in future roles.

Projects

Bookstore Management System (CODE LINK)

Technologies Used: Java, SpringBoot, Hibernate, Thymeleaf, MySQL, HTML, CSS, Bootstrap

- Developed a full-stack web application for managing an online bookstore with role-based user authentication.
- Implemented CRUD operations for books, users, and orders using RESTful APIs.
- Designed a responsive frontend using Thymeleaf templates and Bootstrap for a seamless user experience.
- Managed the database with schema and sample data using MySQL and optimized ORM queries with Hibernate.

CodePen Clone (LINK)

Technologies Used: : React JS, JavaScript, HTML,CSS

- This project is a clone of the CodePen interface, designed to replicate its layout and features
- It utilizes HTML, CSS, and JavaScript to build a responsive and interactive front-end
- The project focuses on modern design practices and includes basic code editing functionalities similar to CodePen.

YT Bookmarker Chrome Extension (LINK)

Technologies Used: : React JS, Chrome storage, Bootstrap

- Developed a Chrome extension using React, enabling users to bookmark YouTube videos with specific timestamps for seamless viewing experience.
- Implemented features for adding, modifying, and deleting bookmarks, enhancing user interaction and content organization.
- Utilized JavaScript and Chrome APIs to create a user-friendly interface, improving video accessibility and efficiency for YouTube users.

Skills

- Programming Languages: **Java, JavaScript**
- Web Development: **HTML, CSS, JSP**
- Frameworks: **ReactJS, Tailwind,Spring, SpringBoot,Hibernate(ORM), Bootstrap**
- Database Management Systems: **MySQL**
- Tools: **Git, GitHub, VS Code, IntelliJ IDEA**

Education

Vignan Institute Of Technology And Management, Berhampur   (2020 - 2024)

B.Tech in Computer Science   CGPA: 7.73

Certifications

- Meta Front-End Course Completed via Coursera (LINK)
- REACT JS via Coursera (LINK)
